

Elevator and agricultural belts

Reko Ltd. produce conveying elevator belts made in Czech REpublic in high range quality.

SORTIMENT:

2 T 16 V3 - V3	2 cylinder belt	permissible stress	16 N/mm
3 T 24 V3 - V3	3 cylinder belt	permissible stress	24 N/mm
4 T 32 V3 - V3	4 cylinder belt	permissible stress	32 N/mm
5 T 40 V3 - V3	5 cylinder belt	permissible stress	40 N/mm
6 T 48 V3 - V3	6 cylinder belt	permissible stress	48 N/mm

With this stress values belts show the maximum extension by 1,5 % - these values are vully consistent with or exceed the value of foreign elevators belts.

CONSTRUCTION:

Bands are formed by 2-6 layers of high strenght PES cord laminated PVC, which are heat combined.

PROPERTIES:

Antistatic	YES	Heat resistance	-10 °C +80 °C
Resistance to oils and common chemicals	YES	Hardness	70 ShA

DIMENSIONS:

Maximum length of 105 m (roll), maximum width 1400 mm (roll). Dimensions can be adapted to specific customer requirements (width and duration).
